

## CSCI 3236 Homework #5

Due date: March 14, 2019 (Thursday), 11:00am

### Chapter 5 Exercises

#### Part I. 8, 23, converting from NFA to DFA

8. Build a DFA that accepts the described language: The set of strings over  $\{a, b\}$  that do not contain the substring  $aaa$ .

23. Let  $M$  be the nondeterministic finite automaton

- Construct the transition table of  $M$ .
- Trace all computations of the string  $aaabb$  in  $M$ .

Hint:

- Exercise 8: design a DFA to accept the complement of the language. Then interchange the accepting and non-accepting states.
- Make sure that you build a DFA for Exercise 8. Not an NFA.
- For Exercise 23 (b), you need to draw the computation tree for string  $aaabb$ , as we learned in class.
